

Advantages of Mitsui Setters

Superiority of deformation resistance	<ul style="list-style-type: none">· Improvement of productivity due to increase of stacks· Reduction of fuel consumption due to low thermal mass· Achieve cost reduction due to free maintenance for kiln furniture· Rise the yield due to the reduction of deformation for products
Superiority of thermal shock resistance	<ul style="list-style-type: none">· Rise the production cycle by quicker firing· Improvement of productivity due to increasing stacks by the reduction of side wall height
Superiority of surface smoothness	<ul style="list-style-type: none">· Rise the yield by reducing of scratch of fired products· Achieve cost reduction by eliminating of “Green Disc”.
